

SMILE, Dental Forms still matter!

Dental practices are growing, and the latest statistics indicate there are nearly 160,000 licensed dentists in the U.S. As electronic claims dominate the healthcare industry, printed claim forms and envelopes remain essential in situations where digital solutions are not feasible.

Why it Matters

Dental offices still need printed forms to:

- Stay legally compliant
- Accurately document patient history
- Communicate across providers
- Speed up front desk workflows
- Get paid faster
