PRESCRIPTION PADS

Standard-Secure Prescription Pads

- ✓ Convenient, Tamper-Resistant Pocket-Size Pads and Books
4 1/4" w x 5 1/2" h (Vertical)
5 1/2" w x 4 1/4" h (Horizontal)
- ✓ 1-part and 2-part prescription pads (printed on part two)
- ✓ Minimum of 4 pad orders accepted on 1-part*
- ✓ Minimum of 9 book orders accepted on 2-part
- ✓ Competitive Leadtime — 3 business days on 1-part up to 48 pads or 2-part up to 27 books (black imprint only)
- ✓ Two-Color Logo Available (on Non-Numbered Pads/Books – upcharges apply)
- ✓ Compliant with the 2008 Requirement for Use of Tamper-Resistant Prescription Pads Under the Medicaid Program.

* Consecutively numbered 1-part pads must be ordered in multiples of 8, 2-part books in multiples of 9

- ✓ Multiple Security Features (see below):

Standard Security Features

Invisible Fluorescent Fibers
Fibers cannot be photocopied and are visible only under a UV light.

Preprinted Prescriber Information
Physician's name, address and license number is imprinted on the pad to prevent fraud during the mailing process.

Chemical Protection Paper
A stain will appear where attempts are made to chemically alter the prescription form.

Microprinting
A magnifying glass must be used to read the "original document" printed within the line. When copied or scanned, the lines become solid.

Reverse Rx
Rx symbol drops out when photocopied to appear white.

Quantity Check Off Box
Designate the units referenced in the quantity boxes when the drug is not in tablet or capsule form.

Thermochromic Ink
The Rx symbol disappears with hot breath or when rubbed briskly with finger. It will disappear when photocopied.

Scallop Void Pantograph*
Repetitive VOID appears across face when color copied.

Blue or green background on white paper
Will inhibit a forger from physically erasing written or printed information.

Watermark printed in coin reactive ink
When rubbed with a coin, words "SECURITY PRESCRIPTION" change color.

Artificial Watermark on Back
When held at an angle, words "SECURITY PRESCRIPTION" appear and cannot be reproduced.

Security Features Listed on Back
Advises recipient of the security features on pad. Allows recipient to verify and reject if the features do not match the listing.

- Rx logo disappears or changes color temporarily with hot breath or when rubbed briskly with finger.
- The face of this document has a blue background on white paper.
- Security Prescription watermark on back.
- Repetitive VOID pattern appears across face when color copied.
- Stain appears where attempts are made to chemically alter the prescription.
- Microprinting in border lines.

*One of the most popular security features, the hidden message VOID technology, is also the most likely to fail. Manufacturers of the VOID can't keep up with the ever changing copier and scanner technology in today's world. That's why Wilmer layers on the security in our check and prescription pad stock to eliminate the ease of copying our products and leaving your customer at risk for counterfeiting. One of the best security features is the thermochromic ink that you can find on many of our stock products. This fades with heat and is impossible to copy. For more information regarding our security features, contact your local sales rep. For best results, the recommended colors are PMS 281 Blue, PMS 249 Plum, PMS357 Green or PMS 175 Brown. The best pantographs to use are the 933 Camo or the 008 Scallop Voids.

Prescription Pad Program

Standard - Secure Green

Security Features: Chemical Protection Paper, Scallop Void Pantograph, Green Background, Security Watermark on Back, Preprinted Prescriber Information, Rx ThermoChromic Ink, Microprinting in Border Line, Watermark in Coin Reactive Ink, Printed Security Feature listing. **Medicaid Compliant.**

Patient Sign-In Label Form

Patient Sign-in Label Form

Each patient prints his/her name, appointment time and "Name of Healthcare Professional" on a numbered line. If using the optional numbered label, patient takes the number. The office staff removes the signed name label and either adds to the patient file or to a workflow tracking system. Once the label has been removed, the information is protected behind part one. Available only for office use.

- The front desk attendant calls each patient by name or number.
- Each package contains 125 forms, numbered 1 through 25, or enough forms to see 3125 patients.
- **NEW!** Out-Of-Country format

COMPATIBLE FILE FOLDERS

11 Pt. File Folders

Our durable, high-quality end-tab folders are constructed of heavy-duty manila stock with an undercut tab design. They are ideal for medical, dental, insurance and banking industries. Alignment marks make labeling easy. Fasteners are applied in the correct positions every time.

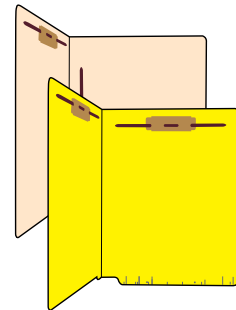

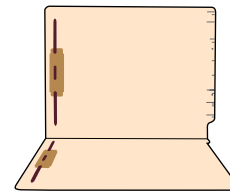

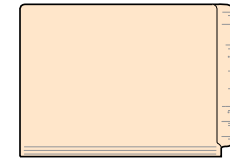

All our end-tab folders are double-ply, with 2" bonded fasteners.

Other fastener positions available

Letter-Size, 3/4 Cut, Standard Double-Ply, End Tab (12¼" w x 9½" h)

W-2552P	8½" x 5½"	9¼" x 6"	8¾" x 5¾"

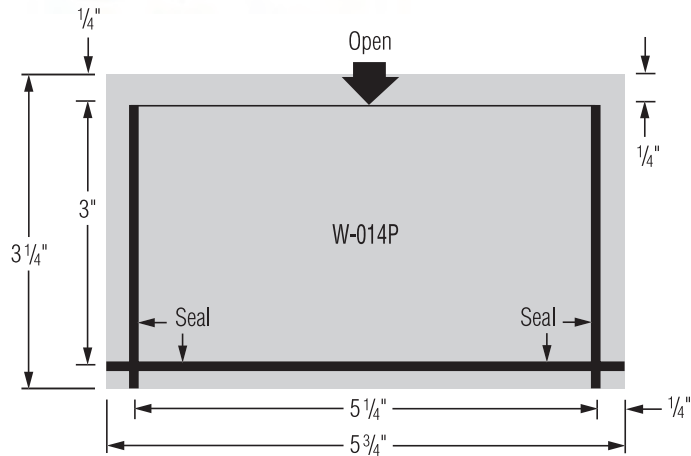

No more misplaced documents! These pockets simplify filing and organization. Simply peel off the backing paper and stick these self-adhesive pockets to file folders, binders, report jackets, or wherever needed.

Packaged in quantities of 100.

Note: First dimension is the side that is open. Pocket is smooth.

Measuring Poly Pockets:

- The dimensions given are *Overall Size*.
- The first dimension is the open side, thus the W-014P (illustrated at right) is read as 5¾" x 3½".
- The seals on the Poly Pockets are approximately ¼" from the outside edges.
- The height of the pocket is ¼" shorter than the back material.
- The pocket width on the W-014P is 5¼" (5¾" - ¼" - ¼").
- The pocket height is 3" (3½" - ¼" - ¼").

Vinyl Pockets with White Backing

Increase the life of your folder. Wrap these labels around folders to protect folder from everyday wear and tear.

Made of clear, 2 mil. premium mylar.

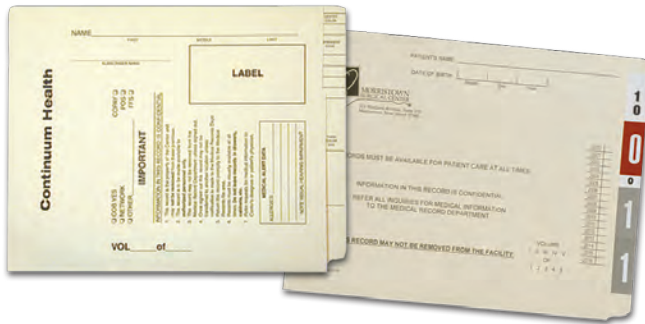

CUSTOM FOLDERS & ACCESSORIES

Custom Folders

Make the folder work for you. Don't work around the folder!

Custom folders give you the flexibility to choose the printing, fastener locations, labels, pockets and more! Leave the assembly to us.

Custom Folders. As unique as you need.

- 11-, 14-, or 15-point stock
- Single reinforced
- Fasteners: bonded, embedded, twin prong, custom clip

Custom Capabilities:

- Custom printing
- Strip labels attached to folder (compatible with all popular label systems)
- Tinting
- Assembly and fulfillment
- Tyvek gussets
- "W" fold in spine with expansion
- Stitched-in dividers
- Poly and paper pockets available

Custom Applications

Any office can improve efficiency when maintaining and researching files!

Doctor, dentist, lawyer, financial investor, product manager, sales consultant...what does each profession have in common? Files!

What's the best system to use?

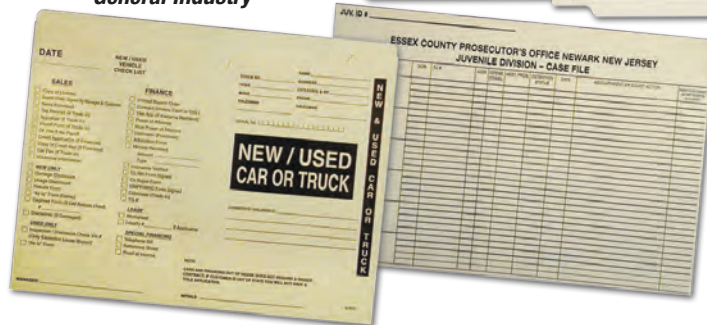

The one that works for YOUR business.

Custom Applications. For chart dividers, indexes and filebacks.

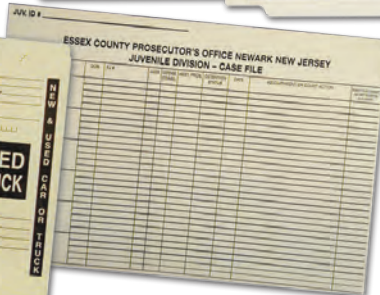

- Improve office efficiency when maintaining and researching files.
- Easily identify custom folders, dividers, filebacks, and/or indexes.
- Record specific information about a patient, client, or product.

CUSTOM FOLDERS & ACCESSORIES

Custom Dividers

The durable, cost-effective index dividers offers a range of index strength with optimum flexibility in customizing your filing or binding system. Choose from colored sheets in polyethylene, white SynthaTab™ or Tyvek® and color code the tabs.

Polyethylene Dividers

Polyethylene dividers provide the most rigid durability. These dividers are perfect for high-usage areas where there is a risk of exposure to liquids, fluids or extreme temperature variations. Order Polyethylene dividers in different sheet colors to coordinate with most filing and color coding systems. Plus, you can customize tab titles and body copy for maximum flexibility. Tab titles are printed on the tab with black ink and are available in side or bottom tab formats.

Due to variances in printing or computer monitor color depth, the actual Polyethylene colors may vary slightly from the examples. Actual Polyethylene samples are available upon request.

1605-Mauve	1841-Blue	517-Gold
834-Orange	081-Ivory	133-Blue
562-Beige	608-Green	360-Lime
882-Lavender	078-Yellow	325-Teal

251-Dusty Rose	048-Light Gray	
999-Natural	169-Peach	
062-Gray	489-Red	
359-Maroon	905-Azure	

Tyvek® Dividers

Tyvek® dividers are durable and virtually rip-proof. Although not meant to withstand wet or caustic environments, Tyvek® is the perfect choice when strength and durability is important. Tyvek® sheets are white and can be color coded by fusing color or clear polyester film to the tabs. Tab titles can be customized and printed in black or color ink.

Tyvek® is a registered trademark of Dupont.

Call for custom quoting.

HEALTHCARE-RELATED PRODUCTS

HIPAA Products

HIPAA requires covered entities to take steps to limit the use and disclosure of PHI, which means that healthcare entities are required to develop policies and procedures that address protecting the privacy and security of patient information. Civil and criminal penalties have been established if covered entities violate patients' rights. The Office of Civil Rights is the oversight agency responsible for HIPAA compliance.

Written Notice of Privacy Practices must be provided to patients on or before the first encounter and to other persons upon request. The Notice notifies the patient of all uses and disclosures of his or her protected health information and outlines all the legal duties of the practice. The form is over seven pages, completely comprehensive and includes all of the key elements required by HIPAA and more! In addition, the form has a removable label which provides practices with a written acknowledgement that the patient received the Privacy Notice (as required to be HIPAA compliant), no need for the practice to make copies and file additional paperwork, simply place the label onto the patient folder. **This form is also available in Spanish and can also be imprinted.**

COLOR-CODED COMPATIBLE LABELS

Features... Functions... and Benefits

We offer compatible color-coded labels for a variety of color filing systems including popular systems such as; Barkley, Col'R'Tab, AmeriFile, GBS/VRE, Jeter, PMA, POS, Safeguard, Smead, TAB and Traco.

Choose from: alpha, numeric, month, year, solid and medical label systems available in roll, ring book, and file box styles. Whatever you choose, you are guaranteed a quality label material that ensures fade resistance, bright colors and acrylic adhesive to hold labels longer.

Features & Benefits:

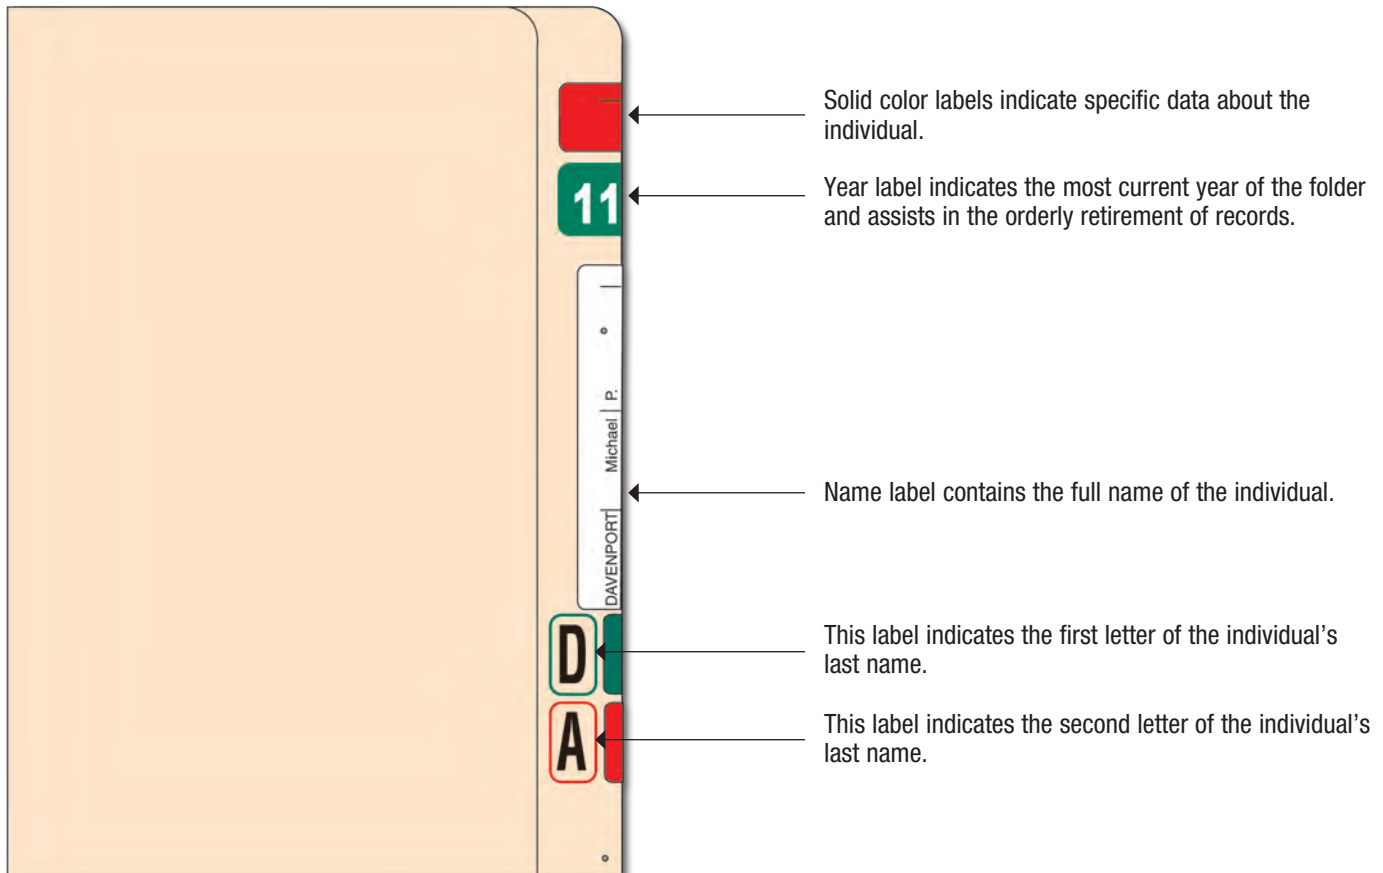

- **Mylar Coating** protects from discoloration and cracking due to moisture and heat, increasing label life.
- **Kindura Paper** maintains original label form, increasing product durability.
- **High-Quality Adhesive** protects the label from lifting off file folders due to humidity, increasing label life.
- **Compatible Labels Manufactured from Special Electronic Measuring Equipment** color-coded to match many popular systems ensure color correctness order after order.
- **Alpha, Numeric and Special Classification Labels** coded with either letters, numbers or specific unique codes (such as allergy) meet a wide variety of customer needs.

Why plan color coding groups?

Understanding alpha and second-letter usage to plan ahead results in your largest search group of like colors being small enough – unique enough – to direct users to a small number of folders.

Note, each geographical area has its own last name frequency characteristics. In the U.S., names like Smith and Jones cause filing problems. But, in many other countries/cultures, only a few common last names are shared. In summary, first and second alpha letter usage helps you determine your filing needs.

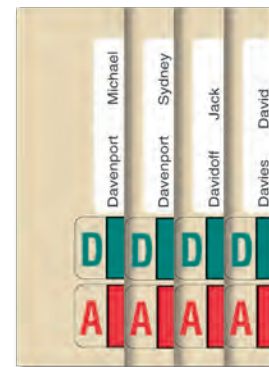

Label Placement Guide

System Identification Methods

Alphabetic

This is the most popular, widely used filing method for systems with less than 5,000 records. File alphabetically by name, individual, company, or any other category. Alphabetic systems allow access to information that does not have to be cross-referenced. By using the first or second letter of a person's last name, a large filing system is reduced to manageable units. Alphabetic labels are available in roll, file box and ring book styles.

Alpha coding's two positions create important color groupings.

Straight Numeric

This system is most often used for large volumes of records exceeding 5,000 records to arrange files by number, in sequential order, from the lowest to highest number. There are no duplication of files as each number is unique. This system increases file confidentiality when referencing the number to an alphabetic cross-reference, and works well with applications like invoices, account numbers, insurance claims, etc.

Terminal Digit

This system works well with large volumes of records exceeding 10,000 records or have records that may have "voids" in their numeric sequence. The files are arranged numerically so file numbers having the same last two digits are grouped together.

While these file numbers are numeric in sequence, file location is determined by reading the last two digits from left to right. Each filing area is divided into 100 equal sections (00-99), making file expansion and contraction easier while eliminating back shifting of files.

Because the first four digits of terminal filing are usually filed in straight numeric sequence, you would find a file labeled 02-16-52 between 02-15-52 and 02-17-52.

Straight numeric color-coding filing system features bold, large digits for improved visibility.

Year Labels

This filing method lets you know at a glance if folders are older or less active and should be removed to free up valuable shelf space. Many operations attach a year label to a file folder at the time the new folder is created to record its origin date.

Year labels come 500 labels per roll packaged in a self-dispensing box, unless noted otherwise. Prior year labels available. We carry a full line of compatible year labels. See our CFP-YLG brochure!

Communication Labels for Healthcare

Use these fluorescent communication labels to convey critical information about a patient, making communication clearer. Communication labels will help prevent mistakes due to poor penmanship.

Solid Color & Special Classification Labels

Use these labels for assigning special territories, credit classifications, certain litigation, types of illnesses or any special coding requirements unique to your office.

Use our medical labels to code patient folders requiring special recognition.

Index Labels

Printed index sheet medical chart/label category or solid colors designed to use with dividers.

Identification of Folders Temporarily Pulled From Their Location

Out Guides have vinyl pockets to identify folders that have been removed temporarily and continue to hold needed information in place until the original file is returned. They come in bright colors such as red, yellow, blue and green vinyl, making it easy to keep track of removed folders.

A 1,000-division terminal digit system with random numbers.

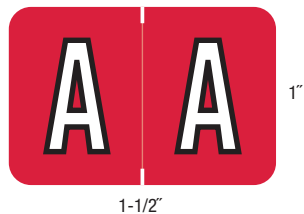

Custom pre-numbered, pre-colored folders increase folder identification!

Numbers, letters, names and barcodes can all be preprinted to meet your particular application needs.
